

Bleachers International

FIRST CLASS BLEACHERS®

Do you remember the last time you spent hours sitting in bleachers?

Your knees almost touching the shoulders in front of you, being a little too close to your "neighbors," not being able to rest your back because of the knees directly behind you?

It was sort of like a long flight in the crowded coach section of an airliner. **Well now your spectators can "fly" first class – with our exclusive First Class Bleachers!**

Our *First Class Bleachers*® let everyone see the event and sit comfortably as well. Offering almost **60% more height between rows, an extra 12" of depth between rows, along with integrated back-rests** – First Class is the only way to go!

Compared to the industry standard bleacher configuration, our *First Class Bleachers* offer superior sightlines, much more legroom and back support. Along with the vertical rail and fully closed deck design, *First Class Bleachers* are the most comfortable, safest and easiest to clean bleachers available.

STANDARD BLEACHERS

Vertical Rise Between Rows:	8"
Horizontal Depth Between Rows:	24"
Back Support:	None
Decking:	Open
Guard Rail:	Chain Link

FIRST CLASS BLEACHERS

Vertical Rise Between Rows:	14"
Horizontal Depth Between Rows:	36"
Back Support:	Full
Decking:	Closed
Guard Rail:	Vertical

FIRST CLASS BLEACHERS®

Bleachers International offers a superior record of reliability and performance. Years of experience enable us to provide virtually any type of bleacher or grandstand seating – from 30 to 30,000 seats. Our large manufacturing plant is centrally located in Colorado, allowing for quick shipment to any location in the United States, Canada and Mexico.

We specialize in all-aluminum bleacher seating and offer complete architectural consulting and design. Our experienced staff can provide a full spectrum of services. They include but are not limited to:

- Preliminary Design and Consulting
- Architectural and Engineering Plans
- Retrofit of Existing Equipment
- Complete Manufacture of all Seating Systems
- Custom Manufacturing Capability
- Total Installation of Equipment

Portable Bleachers . . .

Bleachers International offers a full line of standard all-aluminum portable bleachers, both elevated and nonelevated in 3-, 5-, 10-, 15-, and 20-row x 15' sections with various guardrail options. Mobile tip and roll units are also available. Custom designed units can easily be increased for future expansion.

Permanent Grandstands . . .

Our custom engineered aluminum grandstands are designed for indoor and outdoor use. Several seat and aisle width options are available. Handicap ramps and platforms are available, as well as specialized seating requirements. Our technicians have years of experience in installations, insuring quality construction and maximum safety.

Renovations . . .

Retrofit of existing equipment is one of our specialties. Because aluminum is lightweight, durable and virtually maintenance free, many customers have employed

Bleachers International to renovate their existing bleachers and grandstand systems. Our experts can offer a great deal of assistance with any renovation project.

Installations . . .

Bleachers International has been a supplier to: Parks + Recreation Districts + Schools and Universities + Athletic Facilities + Indoor and Outdoor Sporting Events + Fairgrounds + Rodeos + Amphitheatres + Racetracks + Commercial Uses.

Agency Requirements . . .

All of our equipment meets or exceeds UBC, ICC specifications. Our prefabricated bleacher frames and seats may be assembled by the customer or installed by Bleachers International's technicians.

Bleachers International's all aluminum seating is economical and easy to install. Potable and permanent plank, footboards and accessory hardware are also available.
